SUMMARY

Computer Science undergraduate and frontend-focused MERN stack developer with hands-on experience building REST APIs, database-driven systems, and production web applications. Currently interning at HAT Tech Media, developing frontend interfaces for a POS and inventory management system. Has independently built and deployed several full-stack projects, including a hotel booking website with an ERP for reservations and management, and a POS/ERP system for a grain market (Ghalla Mandi). Passionate about clean, functional development and applying AI tools to build smarter, more efficient applications. Currently open to internship, freelance, and collaborative web development opportunities.

EXPERIENCE

Web Developer — HAT Tech Media

Street No. 30, Zikariya Town, Multan · July 2026 – Present (Internship)

- Developed and maintained frontend interfaces for a POS and inventory management system using the MERN Stack (MongoDB, Express.js, React.js, Node.js).
- Built and integrated REST APIs to connect frontend features with backend databases.
- Collaborated with the development team to debug, test, and deploy features in a live software product.
- Strengthened skills in database management and real-world application architecture.

Web Development Projects — Self-Learning & Independent Practice

Remote · 2025 – Present

- Built and deployed multiple full-stack web projects using HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB.
- Practiced creating responsive, user-friendly interfaces for desktop and mobile browsers.
- Worked with public and custom REST APIs to connect frontend and backend systems.
- Used Git and GitHub to manage project versions and track progress.
- Explored AI tools to support learning and improve development workflow.

PROJECTS

Elysia — Hotel Booking Website & ERP · MERN Stack · [Live Preview](#) (Website) / [Live Preview](#) (ERP)

- Built a full-stack hotel booking website using the MERN Stack, allowing guests to browse rooms and make reservations online.
- Developed a companion ERP system for hotel booking and management, giving staff/admins tools to manage rooms, reservations, and day-to-day operations.
- Designed REST APIs to connect the booking frontend with the ERP backend and MongoDB database.

Ghalla Mandi — POS & ERP System · MERN Stack · [Live Preview](#)

- Developing a POS and ERP system tailored for grain market (mandi) operations using the MERN Stack.
- Building features to manage sales, purchases, and inventory within a point-of-sale workflow.
- Currently in progress as an independent full-stack learning project.

Fitzone Gym — Fitness Knowledge Platform · [Live Preview](#)

- Developed a full-stack fitness knowledge hub using React.js, Node.js, Express.js, and MongoDB, with a responsive frontend and efficient database management.

PharmaFlow — Pharmacy Management Dashboard · [Live Preview](#)

- Built a pharmacy management dashboard to manage medicines, sales, purchases, suppliers, and inventory with real-time analytics (revenue, profit, stock levels, expiry alerts).
- Included an admin interface with reports, sales tracking, and quick actions; deployed on Vercel.

Royal Wedding Invitation — Event Website · [Live Preview](#)

- Developed an elegant wedding invitation website featuring a responsive layout, polished visuals, and a seamless user experience across devices.

Password Validation Web Application — HENNGE Frontend Engineering Challenge · JavaScript · REST API

- Built a frontend app with real-time password validation, API integration, and proper loading/error handling as a coding-challenge submission for an internship application (May 2026).

EDUCATION

Bachelor of Science in Computer Science · Sep 2024 – Jun 2028 (Expected)

Emerson University, Multan, Pakistan

- Relevant Coursework: Object-Oriented Programming, Database Management Systems, Web Development.
- Activities: Participated in university coding and technology events.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), HTML5, CSS3, Python (Learning)
Frontend / Backend:	React.js, Node.js, Express.js
Database:	MongoDB
Tools & Platforms:	Git, GitHub, VS Code, Vercel, Railway, AI Tools
Web Development:	Responsive Web Design, REST API Integration, Full-Stack (MERN) Basics
Other Skills:	Building and deploying full-stack web applications, POS/ERP systems

CERTIFICATIONS

- Google Coursera – Introduction to Artificial Intelligence
- Google Coursera – AI for App Building

ADDITIONAL ACTIVITIES

- Developed and published multiple web development projects on GitHub.
- Actively participated in university coding and technology events.
- Continuously enhancing problem-solving and full-stack development skills through self-directed learning.
- Exploring Python and AI technologies to broaden software development expertise.
